BIN BAGS AND SACKS MADE FROM PCW

Our refuse sacks are made from recycled plastic sourced from used plastic materials collected from households and offices, rather than from production waste. Recycling these everyday materials helps conserve resources and reduce the need for virgin raw materials. For these selected products, the RAL Quality Mark GZ 720 confirms the verified use of recycled materials from such collections.

RAL GÜTEZEICHEN RECYCLING-KUNSTSTOFF

In Germany, **post-consumer waste (PCW)** typically refers to materials collected **via the so-called "Yellow Bag" or "Yellow Bin" recycling system**. These household-sourced plastics play a key role in **conserving resources**, a principle also supported by the **RAL quality mark**.
