**RECHARGEABLE
LED TEALIGHT SETS**

Rechargeable LED tealight sets

Ideal for professional use in the hospitality, hotel and catering sectors (HoReCa).

Whether you prefer a colourful lighting solution or a warm and cosy atmosphere, the **Securif® Amsterdam** tealight set offers a modern, rechargeable lighting solution with the charm of real candlelight. Brightness can be adjusted individually – from a gentle warm flicker to a steady, bright glow.

The LED tealights can be perfectly combined with the matching metal candle holders. Thanks to the magnetic base, they sit securely and firmly in place. They are also water-resistant, making them ideal for both indoor and outdoor use.

 12-40 hours of light on a single charge!

 2-year guarantee

ABOUT US

The PAPERSTAR range comprises over 5,000 consumer goods from more than 200 production lines, covering the categories of disposable tableware and service packaging, table top and room decoration, as well as products for home, professional kitchen and hygiene. In addition to the consistent use of renewable raw materials, the company is increasingly focusing on sustainability-oriented solutions in line with circular material flow management.

For example, food scraps and bio-wastes of plant origin or disposable tableware and napkins made from renewable raw materials can be transformed into a new secondary raw material in a fibre-recovery treatment process. This new secondary raw material can, for example, be recycled for the production of industrial cardboard.

Europe-wide logistics and service concepts ensure the permanent availability of the entire product range.
